

Web Site Rate Schedule:

rev: 07/06

We work with each customer individually, evaluating their particular needs. We help identify strategies that facilitate easy access of the information your visitors seek, and a visual appeal that captures their interest. From company overviews to employee biographies, open letters to personal greetings, past revenues to projected profits, each site is tailored to fit your specific needs. We can also add functionality through services such as shopping carts, online newsletters, data base integration and search capabilities. For high impact, we offer Real™ or Windows Streaming Video/Audio and Flash!™, each leading edge internet standards. To see these and other features in action, visit us at <http://www.stevelovell.com>

Trade Distinctions:

Unlike many in our trade who ransom your artwork, we do not "own" the artwork included in your site*. Most artwork is created in higher resolutions for your future printing needs. (flat rate applies for resampling and exporting of artwork) Whether you're creating your first company website or reworking an existing one, we're able to handle the task. Most site revisions are introduced within 1 - 3 days. Sites are 100% cross browser compatible unless otherwise stated. Our flat rate of \$65 per hour is very competitive and straight forward. (billable in 1/3 increments) We are a small but quality operation, who enjoy creativity and seeing people happy with their visual representation. We believe that our attention to detail and commitment to satisfaction, will result in your continued business and referral of others.

* Note: A copy of artwork is retained for possible future use, and may be exhibited to other clients.

Thank you for the opportunity to further serve you. I'm always available for your questions or comments at (904) 230-8803 or email at steve@stevelovell.com

Best Regards,

Steve Lovell
